SPORT COMPACT COPPER ALLOY VALVE GUIDES

New

Ferrea Super Copper Alloy Valve Guides reflect the highest level of technology applied to produce valve guides.

We proudly introduce the next generation of **extreme heat resistant valve guides**, specifically developed to withstand the Supercharged, Turbocharged, Nitrous Oxide, Dual Power Adders, or 9.0 compression restricted race motors.

We have developed a proprietary processed **high copper-based alloy** combined with other key elements and a **unique heat-treatment process**, which yields extreme heat resistance and vast heat dissipation properties.

All our valve guides are **CNC precision-machined** to exact tolerances. They are ideal for exhaust applications and are compatible with **Stainless and Titanium Valves**.
